03.02 Hazards

Exhaust system and engine	
Danger	Precautions
As the vehicle is used, the components of the exhaust system and the engine itself reach very high temperatures and remain hot long after the engine is switched off.	Always wear insulating gloves when handling these components, or wait as long as necessary for the components to cool.

Electric cooling fans	
Danger	Precautions
After the vehicle is stopped with a warm engine, the electric cooling system fans may activate without warning.	Use particular caution when working near these components.

Petrol	
Danger	Precautions
The petrol contained in the fuel tank and the entire fuel system is highly flammable and, in certain conditions, potentially explosive.	Smoking, sparks and naked flame must not be allowed in the work area or the immediate vicinity. Keep out of reach of children! Always work in a well ventilated area. Never dispose of petrol into the environment!

Used oil	
Danger	Precautions
Prolonged skin contact with used oil may cause severe skin disease.	Keep out of reach of children! To prevent risks, always wear protective gloves and/or wash any areas that have come into contact with used oil thoroughly with soap and water. Never dispose of used oil into the environment!

Hydraulic fluid	
-----------------	--

Danger	Hydraulic fluid	Precautions
Danger	Precautions	
The fluid contained in the brake, clutch and power steering systems is corrosive to plastic, rubber and paintwork and is extremely harmful in the event of contact with the eyes and skin.	In the event of contact, wash the affected area with plenty of running water. To prevent risks, always wear protective eyewear and gloves. Keep out of reach of children! Never dispose of used hydraulic fluid into the environment!	

Coolant	
Danger	Precautions
The cooling circuit contains fluid at high temperature and pressure: contact with hot coolant may cause severe burns. Coolant may cause irritation in the event of skin contact and is poisonous if swallowed.	Keep out of reach of children! Never dispose of coolant into the environment!
