A3.30 Inspecting the braking system

Inspecting the brake system

- Remove the complete wheels ( D2.01).
- Remove the engine compartment cosmetic shields ( E3.14).
 -  Remove the left hand lateral cosmetic shield.
- Check the connection pipes leading to the callipers and to the unions on the rigid lines.
- Check that there is no leakage near the brake master cylinder unions or on the electrohydraulic unit.
- Check that the unions are properly tightened.
- Check that the instrument panel warning lights function correctly.
- If any leakage is found, replace the pipes and/or unions.
- Only in the case of replacing pipes and/or unions. Fill and bleed the brake system ( D3.10).
- Refit the engine compartment cosmetic shields ( E3.14).
 -  Refit the left hand lateral cosmetic shield.
- Refit the complete wheels ( D2.01).
