

CCM Disc Wear Form

Page 01 of 03

Model	Updated
All Models	October 2014

Model:

Customer:

Chassis number:

Date:

Km/mi:

Fault:

Whenever it is not possible to determine the real wear percentage value of CCM discs due to a fault or malfunction of the instrument panel, or in the event of problems attributable to CCM brake discs, please follow the instructions given herein and compile the form attached on pages 1, 2 and 3 completely.

This form must be attached to any ROL pertaining to the aforementioned problems.

DISC WEAR PERCENTAGE, if available (may be read from instrument panel parameters)

FRONT WEAR	
REAR WEAR	

DISC WEAR PERCENTAGE, where values are not available (due to instrument panel defects or malfunction): ENTER THE MOST RECENT KNOWN VALUE.

FRONT WEAR	
REAR WEAR	

VEHICLE USAGE (ask customer)

URBAN ROADS (%)	
MOTORWAY (%)	
SPORTS/ TRACK USE (%)	

NUMBER OF TIMES PADS REPLACED TO DATE

FRONT	
REAR	

CCM Disc Wear Form

Model	Updated
All Models	October 2014

	NUMBER OF PREVIOUS DISC REPLACEMENTS with relative reason/s (wear, failure, accident, damage)
FRONT	
REAR	

	VISUAL STATE OF DISCS (smooth, rough, wrinkled, scored). Take photos of the braking surfaces of the discs showing as much detail as possible, and also specifying the position of the disc on the car (RH front, LH rear etc.), and attach them to the form.
FRONT	
REAR	

ANY ECU ERRORS ATTRIBUTABLE TO BRAKE SWITCH (specify below)

The following image (Fig. 1), with an example of a front CCM disc from the 458 Italia, indicates the locations of the disc identification information required when compiling the form on page 3.

- (A) Ferrari disc part number;
- (B) New disc weight and minimum permissible weight;
- (C) Brembo serial number.

CCM Disc Wear Form

Page 03 of 03

Model	Updated
All Models	October 2014

Compile the following table, taking photos showing each of the following values, and specifying the relative disc (front RT, rear LH etc.), and attach the photos to this form.

	Ferrari disc part number	Brembo serial number	New disc weight	Minimum disc weight	Weight after disc cleaning *
FRONT LH					
FRONT RH					
REAR LH					
REAR RH					

* Each disc must be cleaned before weighing. See the chapter “Brake discs” in the relative Workshop Manual for the vehicle concerned for the correct procedure for cleaning discs. Discs must be weighed using a scale capable providing a reading in single grams.
